ENTERPRISES, INC.

PLASTIC COATED ANIMAL PRODUCTS SINCE 1974

Dura Bilt Calf Stall

Products You Can Trust

Since 1974, ADA Enterprises, Inc. has been leading the ag industry with quality products made to increase production, thereby increasing your bottom line. We believe that animal health and safety is vital for a profitable calf operation. The quality of our products and our customer service are second to none, which is evident by our many loyal and long-term customers.

Bottom-Line Benefits

"With our new calf rearing system it is easy to achieve our target weaning weights on a monthly basis with less mortality.

Eight hundred female calves monthly weaned at 78 days of age at an average weight of 104 kg."

Best Regards, Herds Manager, Al Safi Dairy

Al Safi Dairy, Saudi Arabia

The Only Plastic Coated Steel Calf Stall! Chosen as a 2013 World Ag Expo Top 10 New Product!

Dura Bilt Calf Stall

- Insures the safety and health of calves by keeping them comfortable and dry - no need for additional bedding
- Allows for superior footing and animal safety by aiding traction with appropriate mesh size
- Offers easy access to the calf through the secure gates
- Easy to clean therefore reducing labor costs

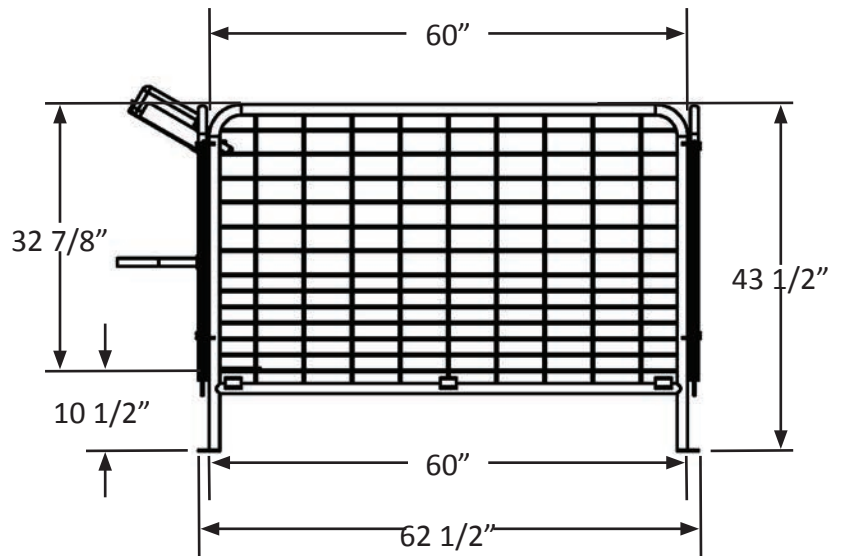

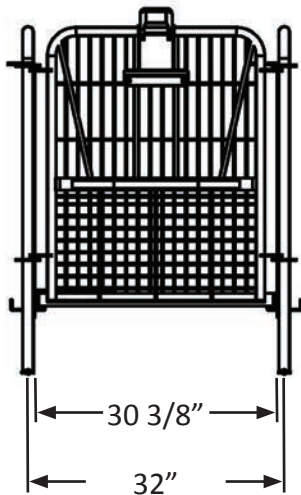

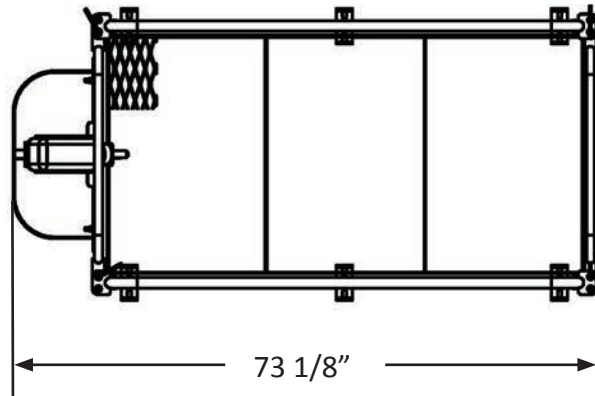

Included in the Complete Unit

- Front and rear gates
- Two side panels - open or solid
- Four drop-in connector pins to connect everything together
- One Dura Trac Clearspan Calf floor, expanded metal or woven wire
- Bucket rack to attach to the front gate with stainless steel bolts and nuts
- Two 8 quart buckets

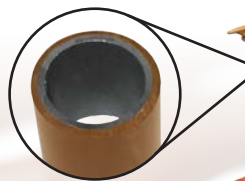

Dura Bilt Calf Products are Completely PVC Coated! No Exposed Steel - Perfect for Kosher Veal

"The thick plastisol coating is designed to keep the calf clean and dry without the need for additional bedding," says Jake Stenzel, Vice President, ADA Enterprises, Inc. "The Dura Trac flooring with its appropriate mesh size aids traction for superior footing and fewer floor-related injuries than bare steel, concrete or other types of flooring. Plus, you can clean the stall quickly and easily with a pressure washer."

Dura Dump Calf Watering System

Save Time and Save Money!

ADA Enterprises, Inc. is excited to introduce the Dura Dump Calf Watering System for the Dura Bilt Calf Stall!

"For every 100 stalls, a farmer will save half an hours' time when using the Dura Dump Calf Watering System", says Vice President, Jake Stenzel. "Dura Dump will save farmers \$45.00/stall/year, paying for itself within the first three years of operation."

Dura Dump is a Complete System

The Dura Dump Calf Watering System together with the Dura Bilt Calf Stall are a completely PVC coated system - the most durable calf stall system on the market!

To operate, unlatch and dump the buckets. To rinse, partially fill the buckets with water, swash and dump the buckets again. Once cleaned, latch the buckets back into place and turn on the water. While filling, start the process over on another set of stalls.

Flexible tubing is used for the plumbing, making installation simple. All the buckets fill uniformly. Most 8-quart buckets can be attached to the Dura Dump. The Dura Dump Calf Watering System may even be custom built to work with your current stalls.

This completely PVC coated steel bottle holder easily attaches to the Dura Bilt Calf Stall with options available for either a two or a three quart bottle. Our bottle holders come with a backstop to keep the bottle from being pushed out, saving you from picking bottles up off the ground.

Dura Trac Calf Flooring

The Advantages of Dura Trac Calf Expanded Metal and Woven Wire

- Aids in traction and reduces floor related injuries
 - Easily allows for modern cleaning methods
 - Resists rust and corrosion
 - Durable and comfortable
 - Reduces stress on the animal
- Built with prime steel and completely covered with a thick coating of plastisol (PVC)

Durability + Traction = Dura Trac

ADA Enterprises, Inc. is committed to customer satisfaction. Dura Trac® Calf Floors are designed especially for newly weaned calves, replacement heifers, and veal calves and can be manufactured to fit any pen or stall. The entire floor is coated with a thick layer of PVC for a long lasting floor that won't rust or corrode. It is ideal for veal calves, easy to clean, and reduces the stress on the calf by keeping them dry and healthy.

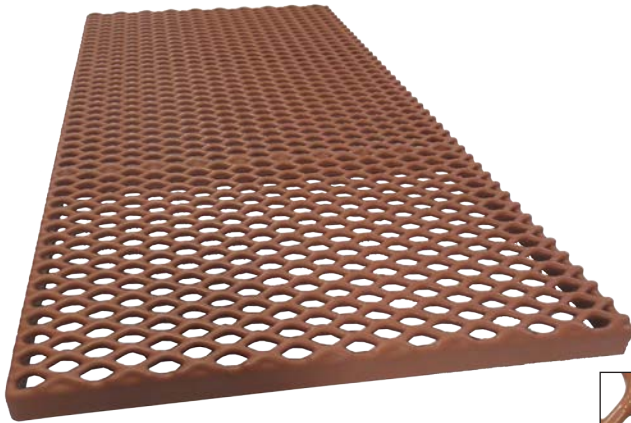

Traction is increased and floor related injuries are decreased with the Dura Trac Calf floor, keeping the newborn calves healthy and safe.

Available in either woven wire or expanded metal, the calf flooring is easily cleaned and very durable.

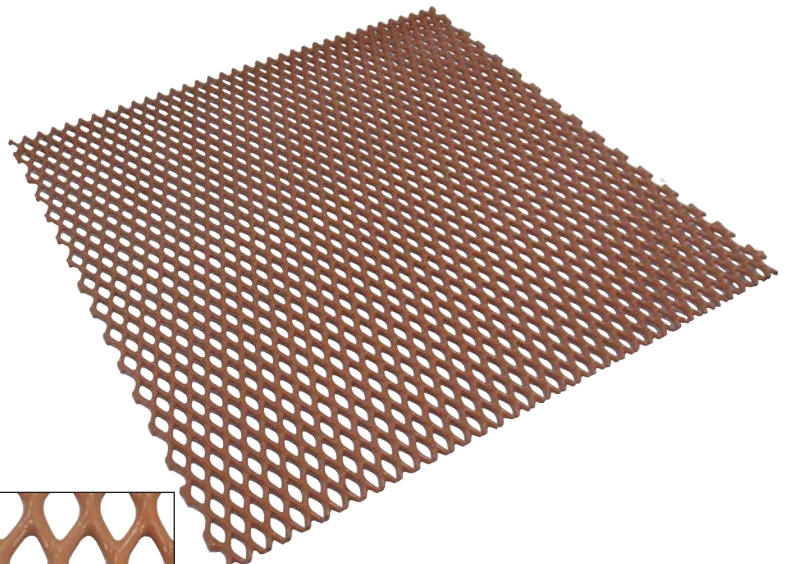

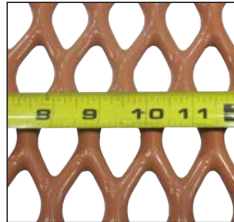

**IDEAL FOR VEAL CALVES ~ EASY TO CLEAN
RESISTS CORROSION ~ REDUCES STRESS**

Dura Trac Calf Flooring

Dura Trac Clearspan Calf Expanded Metal

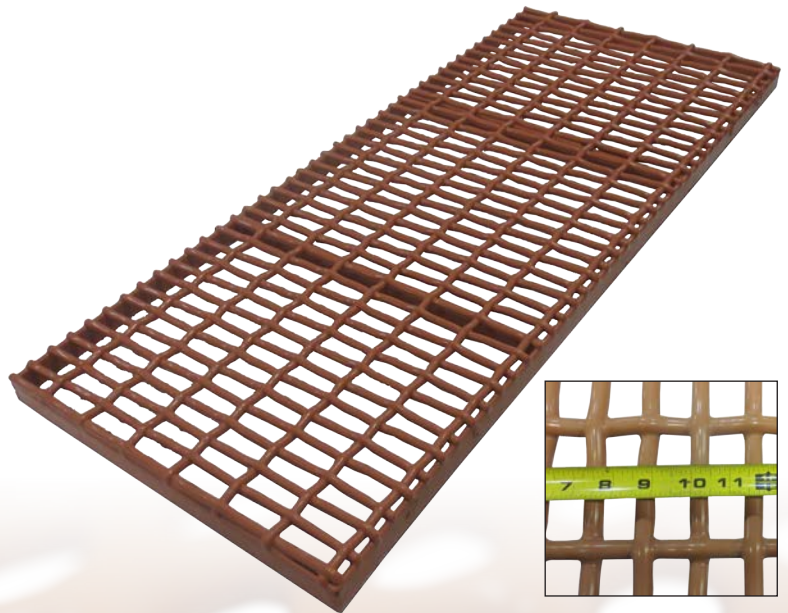

Original Calf Expanded Metal

Clearspan vs Original Flooring

No additional support is necessary when using Dura Trac Clearspan Calf Expanded Metal and Calf Woven Wire flooring. They are completely self-supported.

The Dura Trac Original Calf Expanded Metal and Calf Woven Wire floors are made to use with your supports. They work great for new building and replacement flooring.

Dura Trac Clearspan Calf Woven Wire

ADA Enterprises, Inc. has lead the industry in plastic coated animal flooring since 1974.

Dura Trac Calf Flooring

NO Exposed Metal
Rust
Corrosion
Harboring of Bacteria

The health of your calves is priority #1. Dura Trac calf flooring is specifically designed for good traction and to keep calves warm, dry, and comfortable. The mesh allows most of the fecal matter to fall through onto the floor below, which can easily and efficiently be cleaned to eliminate bacteria buildup.

Dura Trac Calf Floors are designed especially for newly weaned calves, replacement heifers, and veal calves and can be manufactured to fit any pen or stall.

Dura Trac and Dura Bilt calf products are built with prime steel and have a thick, durable PVC coating to resist rust and corrosion.
