NEW! Calf Pen System!

Plastisol Coated Animal Products Since 1974

Dura Bilt Calf Products

Products You Can Trust

Since 1974, ADA Enterprises, Inc. has been leading the ag industry with quality products made to increase production, thereby increasing your bottom line. We believe that animal health and safety is vital for a profitable calf operation. The quality of our products and customer service is second to none, which is evident by our many loyal and long-term customers.

New! Dura Bilt Calf Pen System

We have responded to customer requests and are excited to introduce a new calf product!

The Dura Bilt Calf Pen System is able to convert from a group calf pen to single stalls. The unit is built as one large pen with two removable dividers.

The NEW Dura Bilt Calf Pen System is one large unit that can transition from three stalls to one larger pen by removing the two center dividers. Calf pens have a "starter" unit with four outer sides. To fill in the row of pens, "add-on" calf units can be attached and share a side with the pen before it.

Just like our tried-and-true calf stalls, the calf pens feature sturdy pipe and strong metal flooring. Both styles are completely coated with plastisol making them extremely durable. Options include your choice of solid or vented side panels and expanded metal or woven wire Clearspan calf flooring. We also offer 100% plastisol coated steel bottle holders in either 2 or 3-quart sizes as an accessory to Dura Bilt Calf Pens and Calf Stalls.

Dura Bilt Convertible Calf Pen System

From Individual Calf Stalls to a Group Pen!

Included with the Calf Pen System

- One 3-stall front
- Two side panels for the starter pen (one for the add-on pen) - either vented or solid
- Three front calf gates
- One rear 3-stall gate
- One Dura Trac Clearspan Calf floor - woven wire or expanded metal
- Two 3-stall divider panels, vented or solid
- Drop-in connector pins
- Three bucket holders and 8-quart buckets
- All necessary hardware

The dimensions for the standard calf pen group stall are 61.3" deep by 102" wide. When the dividers are placed in the system, each individual stall is 30" wide and 60" long.

One Dura Trac Clearspan calf floor covers the entire area. There are no seams and no exposed edges.

This completely plastisol coated steel bottle holder easily attaches to the Dura Bilt Calf Stall and Calf Pen System with options available for either a two or a three quart bottle. Our bottle holders come with a backstop to keep the bottle from being pushed out, saving you from picking bottles up off the ground.

Dura Bilt Calf Stalls

**Built with Prime Steel and Coated with Plastisol
to Resist Corrosion.**

Dura Bilt for Healthy Calves

The Dura Bilt Calf Stalls provide the durability and comfort you need for healthy calves. They are single housing units that begin with a "starter" stall. "Add-on" stalls are attached to the starter. You can then continue with the add-ons until the row is complete. The sturdy pipe and strong metal flooring are completely coated with plastisol making them extremely durable and rust-free.

Bottom-Line Benefits

"With our new calf rearing system it is easy to achieve our target weaning weights on a monthly basis with less mortality."

Eight hundred female calves monthly weaned at 78 days of age at an average weight of 104 kg."

Best Regards, Herds Manager, Al Safi Dairy

- Easy to clean therefore reducing labor costs

Included in the Complete Unit

- Front and rear gates
- Two side panels (one for the add-on) - vented or solid
- Four drop-in connector pins to connect everything together
- One Dura Trac Clearspan Calf floor, expanded metal or woven wire
- Bucket rack on the front gate
- Two 8 quart buckets

Dura Bilt Calf Stalls

Specifically Designed for Traction
Plastisol Coating Keeps Calves Warm, Dry, and Comfortable.

"The thick plastisol coating is designed to keep the calf clean and dry without the need for additional bedding," says Jake Stenzel, Vice President, ADA Enterprises, Inc. "The Dura Trac flooring with its appropriate mesh size aids traction for superior footing and fewer floor-related injuries than bare steel, concrete or other types of flooring. Plus, you can clean the stall quickly and easily with a pressure washer."

Add a Bottle Holder - Available in 2 or 3-quart sizes. (shown on page 3)

Dura Trac Calf Flooring

Ideal for Veal Calves | Easy to Clean
Resists Corrosion | Reduces Stress

The Advantages of Dura Trac Calf Expanded Metal and Woven Wire

- Aids in traction and reduces floor related injuries
- Easily allows for modern cleaning methods
- Resists rust and corrosion
- Durable and comfortable
- Reduces stress on the animal
- Built with prime steel and completely covered with a thick coating of plastisol (poly-vinyl)

Durability + Traction = Dura Trac

ADA Enterprises, Inc. is committed to customer satisfaction.

Dura Trac Calf Floors are designed especially for newly weaned calves, replacement heifers, and veal calves and can be manufactured to fit any pen or stall. The entire floor is coated with a thick layer of plastisol for a long lasting floor that won't rust or corrode. It is ideal for veal calves, easy to clean, and reduces the stress on the calf by keeping them dry and healthy.

Traction is increased and floor related injuries are decreased with the Dura Trac Calf floor, keeping the new-born calves healthy and safe.

Available in either woven wire or expanded metal, the calf flooring is easily cleaned and very durable.

Dura Trac Calf Flooring

Leading the Industry in
Plastisol-Coated Animal Flooring Since 1974.

The health of your calves is priority #1. Dura Trac calf flooring is specifically designed for good traction and to keep calves warm, dry, and comfortable. The mesh allows most of the fecal matter to fall through onto the floor below, which can easily and efficiently be cleaned to eliminate bacteria buildup.

NO Exposed Metal
Corrosion
Harboring of Bacteria

Dura Trac Clearspan Calf Expanded Metal

Original Calf Expanded Metal

Clearspan vs Original Flooring

No additional support is necessary when using Dura Trac Clearspan Calf Expanded Metal and Calf Woven Wire flooring. They are completely self-supported.

The Dura Trac Original Calf Expanded Metal and Calf Woven Wire floors are made to use with your supports. They work great for new building and replacement flooring.
